Accident Check

No accidents have been reported to Boat History Report® for this boat.

However, not all accidents are reported to Boat History Report®. Therefore, it is recommended to have a professional inspect this boat before you purchase.

Damage Check

U.S. Coast Guard Documentation Data

Vessel documentation is a national form of registration, which is different than individual state registration requirements. Boats over 5 net tons (generally boats 25ft in length, or larger) in navigable US waters may be documented with the US Coast Guard. Our reports include historic and current US Coast Guard documentation data as it is reported to us.

❗ No US Coast Guard Documentation Data Available

This boat has not been documented with the US Coast Guard or has been documented without a valid HIN.

If your report is missing USCG Documentation information, it could be because the boat was not documented, or was documented using an incomplete or invalid HIN. Prior to 1995, USCG documentation records were not digitized and are therefore not available in our reports. USCG began recording Certificate of Documentation issue date and expiration date in 2002. The absence of an expiration date, or when an expiration date is passed, does not necessarily indicate a vessel is out of documentation, but rather that the boat has been put into investigative status which could indicate pending, removal or transfer of ownership.

State Data

Boat History Report® works with every state's Department of Motor Vehicles and Department of Natural Resources to collect additional boat details. The information shown below was gathered and represents details in addition to the information that has been displayed throughout other sections of your report.

Information that has changed from the previous entry will be highlighted in green.

Many boat manufacturers provide a limited or lifetime warranty on the vessels they make. It is beneficial to understand the warranty information prior to purchasing a new or used vessel.

The first three characters of the HIN designate the manufacturer of the vessel. The first three characters of the HIN you have entered, **TRT**, designate *TRITON BOATS* as the manufacturer.

However, the following manufacturers also share this three letter code:

The Boat History Report® Warranty Check provides an approximation of current warranty coverage for new vessels. Because warranty coverage changes from year to year you should contact the manufacturer or an authorized dealership for more information. Additionally, events in the vessel's history could void its warranty, and are not accounted for in the Boat History Report Warranty Check. These events include, but are not limited to, reported or non-reported accidents, hurricane damage, any other damage, or ownership transfers which may decrease or void warranty coverage.

Recall Check

Many boats manufactured often contain dangerous, potentially fatal flaws. Is your boat safe? Open, unfixed, safety recalls can result in serious injury and sometimes death. Due to safety concerns, manufacturers report recalls every month; however, numerous flawed boats remain in the marketplace. Check below to see if your boat has been issued a safety recall.
